PAGE 3 OF 13

BORROW 1

Barrel jeans, softened

The leg curves out at the knee and back in at the ankle. It doesn't cling anywhere: there's room at the hip and thigh, and the curve draws the eye down the leg instead of across it.

CHANGE THREE THINGS

1. **A soft curve,** not a balloon.
2. **Full length,** down to the ankle bone.
3. **Dark denim.**

Then a long coat on top, so the curve only shows below it, and a pointed flat to finish the leg.

WHEN YOU SHOP

- **Where the curve starts:** at the knee, never at the hip.
- **The fabric:** firm, heavier denim holds the curve; soft stretch denim collapses and looks baggy.
- **The length:** try them with the shoes you'll wear. The hem touches the ankle bone.

Easier ways in: a wide straight jean in the same dark wash, or the barrel shape in grey wool trousers.

MIRROR TEST

Stand sideways. If the curve sticks out further than your hips, go one shape softer.
